The American Institute of Architects New York State (AIANYS) is announcing the recipients of the AIANYS Design Awards. Annually since 1968, the Design Awards has celebrated, honored and promoted excellence in architectural design and planning by New York State architects.

These award winning projects demonstrate the creative skill and use of diverse technologies by architects in their projects, be it a net zero building, resilient designed urban landscape or a artistically designed residence, each add uniqueness to the built environment. These exceptional projects reflect the scope of the architect's involvement in building society's places of commerce, education facilities and housing to realize social and cultural pluralism.

AIANYS President Timothy Boyland, AIA, said, "These projects deserve to be recognized for their innovation, thoughtfulness and all around excellence in architectural design. Applying functionality to a unique idea or design to fulfill a goal is difficult. These projects not only accomplished it, but the architects did a phenomenal job in the achievement. Some of the most magnificent architecture in the world is being created by New York State Architects and these projects epitomize what our architects are capable of."

AIANYS Executive Director Georgi Bailey, said "These projects demonstrate the professionalism and creativity of New York's architects and show the investment of our architects on a global scale. Congratulations to all the recipients and those who submitted their work to the jury."

The recipients were honored at a reception held on the evening of Saturday, October 24, 2015 in Saratoga, NY.

Regional recipients include:

Institutional
