The American Institute of Architects New York State (AIANYS) is announcing the recipients of the 2016 AIANYS Design Awards. Annually since 1968, the Design Awards has celebrated, honored and promoted excellence in architectural design and planning by New York State architects.

These award winning projects from New York architects and in the State invoke our senses, providing us with awe inspiring structures in the built environment. Not only beautiful, but built with preservation in mind, architects plan for resiliency, energy efficiency and sustainability, protecting not only New York and its residents, but, as a global hub for architecture, the citizens around the world.

AIANYS President Margaret O'Donoghue Castillo, FAIA, said, "These projects deserve to be recognized for their imagination and, notably, all-around excellence in architectural design. The award recipients' projects speak volumes about the architects' vision and application of function, innovation and beauty to successfully satisfy the projects' owners. I'd like to acknowledge all who submitted their projects and congratulate the recipients of these prestigious awards."

AIANYS Executive Director Georgi Ann Bailey said, "The quality of our members' work continually impresses me and are universally praised for their design excellence. I commend the recipients on their projects, but the real winners are the people who are lucky enough to consume these works of art."

The recipients will be honored at a reception held on the evening of September 30th, 2016 in Saratoga Springs, NY.

Regional recipients and projects include:
